

Q1: Vocabulary

Choose the correct word to complete the sentences. Choose A, B or C.

1.The weather forecast says the _____ will reach 45 degrees today, so we should stay indoors.

- A. storm
- B. temperature
- C. wind

2.My brother likes to _____ his free time playing computer games.

- A. spend
- B. rest
- C. garden

3.During a _____, the wind blows very strongly and can cause damage to buildings.

- A. heatwave
- B. flood
- C. sandstorm

4.I usually do my _____ before I watch TV or play outside.

- A. activities
- B. homework
- C. comics

5.In autumn, the weather starts to become _____ and leaves fall from the trees.

- A. warm
- B. windy
- C. sunny

Q2: Grammar Maze

Read the Text & Choose The Correct Word(s)

Most people (1) _____ that breakfast is the most important meal of the day. Yesterday, my sister (2) _____ late and missed breakfast, so she decided (3) _____ a quick snack during break time. My mother always (4) _____ us that eating a balanced meal in the morning helps us concentrate better. She said that people who eat breakfast (5) _____ more energetic throughout the day.

1. A) believe

B) believes

C) believing

2.A. wake up

B. wakes up

C. woke up

3.A. have

B. to have

C. having?

4. A. tells

B. tell

C. told

5.A. are

B. is

C. were

Part 3A: Reading

Read the text. Choose True, False, or Not Given for each statement.

Storms are powerful weather events that can happen in many parts of the world. A storm usually brings strong winds, heavy rain, and sometimes thunder and lightning. Some storms are more dangerous than others. For example, hurricanes and tornadoes can cause serious damage to buildings and trees.

Last summer, my family and I experienced a terrible storm while we were on holiday in a small coastal town. The wind was so strong that it broke branches off the trees and blew away garden furniture. The rain did not stop for two days, and the streets were flooded with water. We could not leave our hotel because the roads were too dangerous. My little brother was very scared of the thunder and lightning, but my father told him that storms usually pass quickly.

Fortunately, the storm ended on the third day, and the sun came out again. The town was covered in mud and fallen leaves. Many people came out to clean the streets and help each other. I learned that storms can be frightening, but they also bring communities together.

1. Storms always cause serious damage to buildings and trees.

A) True

B) False

C) Not Given

2. The family was on holiday in a coastal town when the storm happened.

A) True

B) False

C) Not Given

3. The rain stopped after one day.

A) True

B) False

C) Not Given

4. The family left the hotel during the storm.

A) True

B) False

C) Not Given

5. The little brother was scared of the thunder and lightning.

A) True

B) False

C) Not Given

6. The town had no damage after the storm.

A) True

B) False

C) Not Given

Part 3B: Reading

Read the text. Choose the correct answer. Choose A, B or C.

The Burj Khalifa in Dubai is the tallest building in the world. It stands at 828 metres high and has 163 floors. Thousands of tourists visit this famous landmark every year to enjoy the breathtaking views from the observation deck on the 124th floor. The building was officially opened in 2010 and has since become a symbol of modern engineering and design.

The construction of the Burj Khalifa took about six years to complete. More than 12,000 workers from different countries contributed to building it. The design was inspired by the shape of a desert flower, which is native to the region. The building also features a large water fountain system, which is one of the largest in the world.

Visitors can take a high-speed elevator to the top, which travels at 10 metres per second. At the top, they can see the entire city of Dubai and even the Arabian Gulf on a clear day. Many people also visit the Dubai Mall, which is located next to the Burj Khalifa. The mall has over 1,200 shops and attracts millions of visitors each year.

1. What is the main idea of the text?

- A. The Burj Khalifa was built in one year.
- B. The Dubai Mall is larger than the Burj Khalifa.
- C. The Burj Khalifa is a famous landmark in Dubai with many unique features.

2. How tall is the Burj Khalifa?

- A. 163 metres
- B. 1,200 metres
- C. 828 metres

3. When was the Burj Khalifa officially opened?

- A. In 2015
- B. In 2010
- C. In 2004

4. What inspired the design of the Burj Khalifa?

- A. A desert flower
- B. A mountain
- C. A modern building

5. How fast does the elevator travel?

- A. 20 metres per second
- B. 10 metres per second
- C. 30 metres per second

6. What does the word "observation deck" mean in the text?

- A. A place where people can sleep
- B. A place where people can buy food
- C. A place where people can watch the view

7. What is located next to the Burj Khalifa?

- A. The Dubai Mall
- B. The Arabian Gulf
- C. The Dubai Fountain

Part 3C: Reading

Read the text. Choose the correct answer. Choose A, B or C.

Extreme weather events have become more frequent and intense in recent years due to climate change. Scientists warn that rising global temperatures are causing more powerful storms, longer heatwaves, and severe flooding in many parts of the world. These weather phenomena not only threaten human lives but also damage infrastructure, agriculture, and natural ecosystems.

One of the most destructive extreme weather events is the tropical cyclone, also known as a hurricane or typhoon depending on the region. These storms form over warm ocean waters and can reach wind speeds of over 250 kilometres per hour. When they make landfall, they bring destructive winds, heavy rainfall, and storm surges that can flood coastal areas.

In addition to cyclones, heatwaves have become increasingly common in regions that previously experienced mild summers. Prolonged periods of extreme heat can cause health problems, particularly among the elderly and young children. Furthermore, droughts resulting from lack of rainfall can lead to water shortages and crop failures, affecting food security.

Governments and communities are now focusing on improving early warning systems and building more resilient infrastructure. However, experts agree that reducing greenhouse gas emissions remains the most effective long-term solution to mitigate the impacts of extreme weather.

1. What is the main idea of the text?

- A. Extreme weather events are becoming more common and have serious consequences.
- B. Tropical cyclones are the only type of extreme weather.
- C. Governments have already solved the problem of climate change.

2. What is another name for a tropical cyclone in some regions?

- A. Tornado
- B. Typhoon
- C. Monsoon

3. How fast can tropical cyclones reach in wind speed?

- A. Over 150 kilometres per hour
- B. Over 200 kilometres per hour
- C. Over 250 kilometres per hour

4. What do storm surges cause when a cyclone makes landfall?

- A. Landslides in mountainous areas
- B. Flooding in coastal areas
- C. Volcanic eruptions

5. Why are heatwaves particularly dangerous for certain groups?

- A. They cause crop failures and water shortages.
- B. They can cause health problems for the elderly and young children.
- C. They destroy infrastructure and buildings.

6. What does the word "mitigate" mean in the context of the text?

- A. To increase the effects of something
- B. To reduce the severity of something
- C. To ignore the existence of something

7. What is considered the most effective long-term solution to extreme weather?

- A. Building more resilient infrastructure
- B. Improving early warning systems
- C. Reducing greenhouse gas emissions

Answers : Q1: Vocabulary

Answer Key:

B – temperature

A – spend

C – sandstorm

B – homework

B – windy

Q2: Grammar Maze

Most people (1) believe that breakfast is the most important meal of the day. Yesterday, my sister (2) woke up late and missed breakfast, so she decided (3) to have a quick snack during break time. My mother always (4) tells us that eating a balanced meal in the morning helps us concentrate better. She said that people who eat breakfast (5) are more energetic throughout the day.

Part 3A: Reading

B – False

A – True

B – False

B – False

A – True

B – False

Part 3B: Reading

1. C – The Burj Khalifa is a famous landmark in Dubai with many unique features.
2. C – 828 metres
3. B – In 2010
4. A – A desert flower
5. B – 10 metres per second
6. C – A place where people can watch the view
7. A – The Dubai Mall

Part 3C: Reading

1. A – Extreme weather events are becoming more common and have serious consequences.
2. B – Typhoon
3. C – Over 250 kilometres per hour
4. B – Flooding in coastal areas
5. B – They can cause health problems for the elderly and young children.
6. B – To reduce the severity of something
7. C – Reducing greenhouse gas emissions
